## DETAILED ACTION

This Office Action is in response to the amendment filed 18 September 2002.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 36-45 and 61-65 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 36-45 and 61-65 disclose a source or drain region elevationally above the channel region and one of the regions to have a portion thicker than the channel region. These limitations are not described in the specification and therefore are considered new matter.

Claims 46-55 and 66-70 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 46-55 and 66-70 disclose a second thin film source/drain region, where the first source/drain region has a different thickness than the second source/drain region. These limitations are not described in the specification and therefore are considered new matter.

Claims 56-60 and 71-75 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 56-60 and 71-75 disclose an annulus having a top disposed elevationally below the upper surface, a first and second diffusion region disposed over the upper surface. These limitations are not described in the specification and therefore are considered new matter.

### ***Response to Arguments***

Applicant's arguments filed 18 September 2002 have been fully considered but they are not persuasive. Claims 36-75 are rejection for containing new matter. In regards to the arguments dealing with the disclosure of the limitations being found in Figs. 5,6 and 11, the drawings are not drawn to scale and if you look at Figs. 5 and 11 the channel region (31) looks to have a thickness larger than the source and drain regions (32) and also one can not determined whether the two source and drain regions (13/32) have two different thicknesses so the drawings still do not disclose the limitations claimed. Therefore the rejection stands.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
